

APPLIED GEOLOGY

Field/Monitoring Technician

Applied Geology Ltd specialises in undertaking geotechnical and contaminated land investigations and providing related consultancy services throughout the UK. Due to our continued growth and high workload, we are seeking to recruit a full time Field/Monitoring Technician to work with our team of Engineers, Geologists and Environmental Specialists.

The diverse role would be split between site based duties including groundwater and ground gas monitoring and sampling, soil sampling, in-situ testing, assisting with site set up and demobilisation, fieldwork operations, sample and equipment deliveries and office based duties including data processing and other general tasks as required.

The candidate must have a minimum of GCSE 'B' Grades in Maths and English, together with basic computer skills. The role requires a willingness to work outdoors throughout the year in all weathers and some flexibility in working hours within the normal working week. Occasional overnight stays would be required. A Full driving licence is essential.

Training will be given for all site and office duties required to be undertaken.

This permanent position would be based in our Kenilworth office and involve a minimum of 37.5 hours per week. A competitive salary, commensurate with qualifications and experience would be offered, plus overtime for site work, twenty-five days holiday per year (+Bank Holidays), a contributory company pension scheme and life insurance cover.

Please submit your CV and covering letter either as hard copy or by email to:

John Cartwright, Applied Geology Ltd, Unit 23 Abbey Park, Kenilworth, Warwickshire, CV8 2LY.
