

APPLiED GEOLOGY

Senior/Principal Contaminated Land Specialist

Applied Geology Ltd specialises in the provision of geotechnical and contaminated land ground investigation and related consultancy services throughout the UK. Due to our continued growth and high workload, we are seeking to recruit a full time Senior/Principal Contaminated Land Specialist to work with our team of Geotechnical Engineers, Engineering Geologists and Environmental Specialists.

The successful candidate will have broad and in depth experience in the geoenvironmental/contaminated land sector, preferably with experience in both ground investigation and consultancy business environments. The candidate should have specific experience in and understanding of the development of conceptual models, the design and specification of investigation works, review of data and scheduling of testing, together with associated assessment/reporting, development of remediation strategies and subsequent validation, regulatory liaison and specific knowledge and experience in quantitative risk assessment. They should have an appropriate earth sciences first degree and ideally a specialist Masters degree in an appropriate subject and will have a current UK driving licence. They will need to display a proven ability to manage their own projects as well as act as a technical resource for other professionals, oversee work by more junior staff and display a strong customer focus. Some geotechnical knowledge and understanding would be an advantage but is not essential.

This permanent position would be based in our Kenilworth office and involve a minimum of 37.5 hours per week. A competitive salary, commensurate with qualifications and experience would be offered. Twenty-five days holiday per year (+Bank Holidays), a contributory company pension scheme and life insurance cover are also provided.

Please submit your CV and covering letter either as hard copy or by email to:

John Cartwright, Applied Geology Ltd, Unit 23 Abbey Park, Kenilworth, Warwickshire, CV8 2LY.
