

APPLIED GEOLOGY

Assistant Land Driller

Working for a successful privately owned Geotechnical & Contaminated Land Specialist, you will be providing support to the lead Land Driller working on a varied range of outdoor locations and construction sites as part of our ground investigation team.

You will be required to work as part of a 2-man crew operating a cable percussion drilling rig and be located in close proximity to the Lead Driller and rig storage yard (Daventry). When drilling work is not available general site duties will usually be assigned which can include hand digging, concrete coring, equipment maintenance etc.

The role involves travelling throughout the UK and frequent working away from home, where accommodation and subsistence will be provided. Occasional weekend working may be required for which overtime will be paid.

The ideal candidate will have CSCS/CPCS card, full UK driving license and preferably some previous construction site experience. However, full training is available to a suitable candidate, including CSCS and NVQ Land Drilling, manual handling, first aid at work, towing, Cat and Genny.

The position is offered with a salary of £24-28k per annum, depending on experience, plus twenty-five days holiday per year (+Bank Holidays), a contributory company pension scheme and life insurance cover.

Please submit your CV and covering letter either as hard copy or by email to:

Applied Geology Ltd, The Old Barn, Church Farm, Fulbrook Lane, Sherbourne, Warwick, CV35 8AR.
