

## Graduate Geologist/Engineering Geologist

Applied Geology Ltd specialises in undertaking geotechnical and contaminated land investigations and providing related consultancy services throughout the UK. Due to our continued growth and high workload, we are seeking to recruit a full time Graduate Geologist/Engineering Geologist to work with our team of Engineers, Geologists and Geoenvironmental Specialists.

The role would be split between fieldwork including site investigations, in situ geotechnical testing, soil sampling, earthworks and remediation validation and office tasks, involving project management, desk studies, collating and reviewing data and producing factual and interpretative technical reports using MS Office Software, AutoCAD LT and various geotechnical software packages. The role will involve a bias towards field-based duties in the short to medium term.

The candidate must have a BSc or BEng degree qualification in Geology, Engineering Geology or a related Earth Science subject with a minimum 2(i) (upper second class) grade and **at least 1 years of relevant experience in the UK geotechnical and/or geo-environmental ground investigation/consultancy sector**. In addition, a full driving licence is essential and the successful candidate must be willing to work outdoors throughout the year.

This permanent position would be based in our Kenilworth office and involve a minimum of 37.5 hours per week. A competitive salary, commensurate with qualifications and experience would be offered, plus overtime for site work. Twenty-five days holiday per year (+Bank Holidays), a contributory company pension scheme and life insurance cover are also available.

Please submit your CV and covering letter either as hard copy or by email to:

John Cartwright, Applied Geology Ltd, Unit 23 Abbey Park, Kenilworth, Warwickshire, CV8 2LY.
