

# **APPLiED GEOLOGY**

## **Principal/Associate Contaminated Land Specialist**

Applied Geology Ltd specialises in the provision of geotechnical and contaminated land ground investigation and related consultancy services throughout the UK, operating from offices in Warwick & Lowton, Warrington. Due to our continued growth and high workload, we are seeking to recruit a full time Principal /Associate level Contaminated Land Specialist to work closely with our team of Geotechnical Engineers, Engineering Geologists & Environmental Specialists, alongside the owner Directors.

The successful candidate will have broad and in-depth experience in the geoenvironmental/contaminated land sector, preferably with experience in ground investigation and consultancy business environments. Experience of remediation contracting would also be an advantage. The candidate should have specific and in depth experience in and understanding of the development of conceptual models, the design and specification of investigation works, review of data and scheduling of testing, together with associated assessment/reporting, experience of ground gas risk assessment, waste classification, development of remediation strategies and subsequent supervision and validation, regulatory liaison and specific knowledge and experience in quantitative risk assessment. They should have an appropriate earth sciences first degree, ideally a specialist Masters degree in an appropriate subject, hold CGeol, SiIC and/or SoBRA accreditations and will have a current UK driving licence. They will need to display a proven ability to manage their own projects & lead project teams as well as act as a technical resource for other professionals, oversee work by more junior staff and display a strong customer focus with the ability to effectively communicate confidently at all levels. Some geotechnical knowledge and understanding would be an advantage but is not essential. This is a key appointment as part of our business strategy & future Senior Management/Equity opportunities exist for the right candidate.

This permanent position would be based in either our Warwick or Lowton office and involve a minimum of 37.5 hours per week. A competitive salary, commensurate with qualifications and experience would be offered. Twenty-five days holiday per year (+Bank Holidays), a contributory company pension scheme and life insurance cover are also provided.

Please submit your CV and covering letter either as hard copy or by email to:

John Cartwright, Applied Geology Ltd, The Old Barn, Church Farm, Fulbrook Lane, Sherbourne, Warwick, CV35 8AR.
